PROFESSIONAL SUMMARY

IT support professional with nearly three years of Tier 1 and Tier 2 experience helping 70+ employees in person and remotely in a high-volume service environment (about 200–300 tickets daily across ServiceNow, Zendesk, and Jira), meeting SLA targets on 88% of tickets with a 90% CSAT. Troubleshoots hardware, software, accounts and access, connectivity, and cloud application issues on Windows and macOS, and knows when to document clearly and escalate complex issues. Experienced with identity and access (Okta/SSO/MFA, Active Directory, Entra ID, Google Workspace), device management (Iru/Kandji, Jamf, Intune), onboarding/offboarding, asset tracking, and security-conscious support aligned with SOC 2 and ISO 27001. AWS Certified CloudOps Engineer – Associate who builds Python/Boto3 and Terraform projects to keep growing in cloud operations and automation.

CORE COMPETENCIES

Support & Service Delivery: Tier 1 / Tier 2 Support • Incident & Request Management • Remote and On-Site Support • Root-Cause Troubleshooting • Escalation & Handoff • Knowledge Base / Runbooks • Customer Service for Non-Technical Users • SLA-Driven Prioritization

ITSM / Ticketing: ServiceNow • Zendesk • Jira • Remedy • ConnectWise

Identity & Access: Okta • SSO • MFA • Active Directory • Microsoft Entra ID • Google Workspace • Microsoft 365 • Exchange • SharePoint • Citrix • Account Provisioning • Access Reviews

Endpoint & Device Management: Iru / Kandji • Jamf • Intune • Windows 10/11 • macOS • iPadOS • Linux (Ubuntu, Debian) • Device Setup & Deployment • IT Asset Inventory • Endpoint Security

Networking: TCP/IP • DNS • DHCP • Wi-Fi • VPN / Remote Access • RDP • ipconfig, ping, and command-line diagnostics

Security & Compliance: SOC 2 • ISO 27001 • Access Reviews • Least Privilege • Security Best Practices • Data Privacy

Cloud & Automation: AWS (IAM, Lambda, DynamoDB, CloudWatch, VPC, API Gateway, EventBridge, SNS, EC2, S3, CloudShell) · Python · Boto3 · Java · PowerShell · SQL · JSON · Terraform · GitHub Actions · Git/GitHub

Collaboration: Microsoft Outlook, Teams, Word, Excel, OneDrive • Slack • Zoom

CERTIFICATION

AWS Certified CloudOps Engineer – Associate | Amazon Web Services (AWS) — Issued Aug 2026 • Expires Aug 2029 • Verify at aws.amazon.com/verification

PROFESSIONAL EXPERIENCE

Junior IT Support Specialist | Debt RX, Maryland — Oct 2023 – Sep 2026

- Delivered Tier 1 and Tier 2 support across hardware, software, identity, network, and cloud application issues, serving as a primary point of contact for 70+ employees in person and remotely.
- Worked a high-volume IT queue of about 200–300 tickets daily in ServiceNow, Zendesk, and Jira, documenting incidents, categorizing and prioritizing requests, tracking progress, and recording troubleshooting steps so issues could be escalated cleanly.
- Met SLA targets on 88% of tickets in that high-volume queue, with a 90% CSAT and an average resolution time under 4 hours.
- Stayed calm and clear with frustrated employees who were blocked from work, setting realistic expectations and following up until resolved.
- Resolved issues remotely using remote-control tools, avoiding on-site visits and keeping employees productive.
- Troubleshot network connectivity (TCP/IP, DNS, DHCP, Wi-Fi, VPN, RDP) with ipconfig, ping, and command-line tools to isolate whether the cause was the device, network, authentication, or application.
- Managed user accounts, permissions, and password resets in Active Directory, and supported Microsoft Entra ID, Microsoft 365, and Citrix/remote-access issues, giving clear guidance to non-technical employees.
- Administered Google Workspace and supported identity and access management, SSO, and MFA with Okta, plus SaaS applications.
- Managed and supported Windows and macOS devices through Iru / Kandji, Jamf, and Intune; upgraded and configured employee computers to improve reliability and performance.
- Handled employee onboarding and offboarding end to end, including device setup, account provisioning, application access, and access removal.

- Configured, deployed, tracked, and maintained laptops and other IT equipment, keeping an accurate asset inventory and IT documentation.
- Supported access to enterprise AI tools, including Glean: handled account setup, removal, permissions, and licenses, resolved Tier 1 and Tier 2 access tickets, completed access reviews under data privacy policies, and trained employees through demos and one-on-one coaching.
- Assisted with access reviews and SOC 2 / ISO 27001 compliance activities, following security best practices when handling sensitive information.
- Escalated complex technical and security issues to a lead IT professional and senior IT team members after testing possible causes, with clear notes to speed resolution.
- Wrote runbooks and how-to guides that helped reduce repeat issues and made common problems easier for employees to solve.
- Used PowerShell and Command Prompt to investigate system, network, and account issues and to automate repetitive support tasks.
- **SQL / data troubleshooting:** Used SQL to investigate customer account issues, check for missing, duplicate, or inconsistent application records, review ticket patterns and categories, validate data before and after approved updates or migrations, and provide specific findings for Tier 2 / Tier 3 teams.

Assistant Manager / Manager / Shift Lead | McDonald's, Maryland — Aug 2021 – Oct 2023

- Earned three promotions in about two years (Crew Member to Shift Lead, Manager, and Assistant Manager) and was trusted as acting General Manager during absences.
- Led crews in a high-volume, fast-paced environment, keeping shifts on track.
- De-escalated upset customers and resolved complaints calmly and quickly, including payment issues, disputed charges, and refunds.
- Assisted with scheduling, hiring, onboarding, and training new employees, and sometimes conducted interviews.
- Coached team members on procedures and service standards.
- Handled payments, refunds, and disputed transactions, plus safe counts, cash deposits, payroll, labor costs, inventory, and operational reporting, following cash-handling and time/temperature procedures.
- **Timekeeping and scheduling:** Reviewed timekeeping and payroll-related records, helped address discrepancies, and supported employee scheduling and attendance coordination.

TECHNICAL PROJECTS

Full portfolio: lumbilak65-sketch.github.io/Kevin-Lumbila-s-PORTFOLIO • GitHub: github.com/lumbilak65-sketch

AWS IT Help Desk Platform | API Gateway • Lambda • DynamoDB • IAM • CloudWatch • Python/Boto3 • Terraform

- Built an AWS-based internal IT help desk API where Python/Boto3 Lambda functions behind API Gateway create, classify, assign, escalate, and track support tickets stored in DynamoDB through resolution.
- Used IAM roles to control access and CloudWatch logging for troubleshooting; defined the infrastructure in Terraform so it can be rebuilt the same way every time.

CloudGuard: Serverless AWS Security & Cost Auditor | Lambda • EventBridge • DynamoDB • SNS • IAM • Terraform • GitHub Actions

- Built a serverless auditor in which a daily Lambda function checks for open security-group ports, public S3 buckets, IAM users without MFA, and unused EBS volumes and Elastic IPs, then emails a prioritized report.
- Stored results in DynamoDB, added CloudWatch alarms and SNS alerts, defined all infrastructure in Terraform with read-only IAM permissions, and wrote 39 automated tests that run in GitHub Actions on every change.

AWS Cloud Monitoring & Alerting | EventBridge • Lambda • SNS • CloudWatch • IAM • Terraform

- Scheduled EventBridge-triggered Lambda health checks with CloudWatch visibility and SNS email alerts to operators when something fails, removing manual checks. Provisioned with Terraform and least-privilege IAM.

AWS Serverless CI/CD Pipeline | GitHub Actions • Terraform • Python • Infrastructure as Code

- Built a GitHub Actions pipeline that runs Python tests and validates Terraform on every push and pull request, catching errors before they reach AWS.

EDUCATION

Associate of Science, Computer Science | Frederick Community College, Frederick, Maryland — Jan 2024 – Jun 2026
Greaves Adventist Academy | Montreal, Canada — Graduated 2021
